

Usability Test Script for Local Olympics App Figma Wireframes

Greeting and Onboarding

Hello, and thank you for participating in this usability test! Your feedback will help us ensure that our mobile app is user-friendly and meets the needs of people who want to create, structure, and share local Olympic-style games in their communities.

This session will take approximately 30 minutes. During the test, I'll provide you with a scenario to complete using the wireframes we've designed. Please keep in mind that we're testing the design, not your abilities, so there are no right or wrong answers.

Feel free to think aloud as you go through the tasks. Let us know what you find easy or challenging, as well as any thoughts or questions that come to mind. If you have any concerns or feel uncomfortable at any time, you can stop the test.

Do you have any questions before we begin?

Scenario

You are part of a local community group planning a "Neighborhood Olympics" event for next month. Your goal is to use our app to plan and share your event. Imagine this app is installed on your phone, and you're testing it for the first time.

Please complete the following tasks:

1. **Explore Event Options:** Navigate through the app to understand what features are available for creating a local Olympic event.
2. **Create an Event:** Set up an event called *Spring Games* scheduled for two weeks from today. Include three activities: 100-meter sprint, tug-of-war, and a local trivia quiz. Use the available templates to set up the event
3. **Invite Participants:** Use the app to invite five participants to your event. Assume their names are Alex, James, Pamela, Marco, and Kevin.
4. **Take poll:** Test the popularity of your event by taking a poll. Invite your friends to take part in the poll.
5. **Publish Your Event:** Share the event with your neighborhood by publishing it within the app.

As you complete these tasks, please let us know your thoughts on the process. Was anything unclear or unexpected?

Conclusion

Thank you for completing the test! Your feedback is incredibly valuable to us as we refine this app.

Before we wrap up, do you have any final thoughts about the experience? Was there anything that stood out—either positively or negatively—that you haven't mentioned yet?

Thank you again for your time and insights. We'll use your input to create a better experience for future users!
