

Main Ideas From Ideation B Workshop

Interactive Sustainability Dashboard

- **Description:** A real-time dashboard accessible on the platform, displaying metrics on environmental impacts such as carbon footprint, energy consumption, and waste management from Olympic venues.
- **Key Features:**
 - Visual elements like maps, graphs, and comparison tables.
 - Users can filter data by category (e.g., water usage, air quality).
 - Social impact indicators, like economic benefits to local communities, volunteer involvement, and public sentiment metrics.
